

something like this visually?

REACTIVE WEATHER

Up to the minute weather news

New York City

London

9
Rainy

Paris

13
Partly cloudy

Tokyo
18

Los Angeles
22

Member info:
Name,
Company,
Student or Coach,
Bootcamp start date?
(if we want extra
information) Favourite
Programming
Language

Database has:
Members
Companies
Student
Coach
in various
relationships

**Extension
idea:**
Server-side
validation

**Do we need a card
model?**
Need to actually
look at that Reactive
Weather repo, see
how it works!

Fiddling about
with some
colour
schemes - not
sure I like this
pink XD
